

Cancer data Shapley RMSE vs. total utility calls

455 training points as players · 114 fixed test points · RBF-SVM accuracy · 10 repeats per budget · 228.4k–4.55M total calls

Ratio estimators

Linear estimators

Shaded bands: 95% repeat bootstrap intervals. Both axes use logarithmic scales. Total calls include 912 exact boundary evaluations. Ground-truth SE-RMSE: 1.82×10^{-5} .
