

Iris data Shapley RMSE vs. total utility calls

120 training points as players · 30 fixed test points · RBF-SVM accuracy · 10 repeats per budget · 60.2k–1.20M total calls

Ratio estimators

Linear estimators

Shaded bands: 95% repeat bootstrap intervals. Both axes use logarithmic scales. Total calls include 242 exact boundary evaluations. Ground-truth SE-RMSE: 3.28e-05.
